The Securamesh Twinwire 656 fence system provides a very versatile mesh fence system that is stronger than the Securamesh 1000 \& 2000. This system can be used in a number of different applications - including industrial estates, retail parks, industrial buildings, playgrounds and is also particularly suitable for use around sport enclosures.

## Posts, Clamp Bars \& Fixings

The posts \& clamp bar that Securafit security products offers with the Securamesh twin wire system allows for variation whilst securing the panels. The system is easy to install and allows the panels to be stepped, helping the fence line to follow the contours of the ground. By using the full length clamp bar, the edge of the mesh is protected.

## Finish

Panels and posts are submitted to number of precoat processes and are galvanised with the option to be powder coated in a variety of colours. All fixings are fully galvanised, or made from stainless steel.

## Mesh panel

This mesh comprises of $\emptyset 6 \mathrm{~mm}$ vertical wire with two $\varnothing 8 \mathrm{~mm}$ wire welded either side at regular intervals. Posts are set apart at 2.5 m intervals. The panel can be secured with either clips or clamp bars.

## Securamesh Twinwire 656

Typical Construction for Securamesh Twinwire Side Elevation Post Configurations

## Construction Key Table

1 Mesh Panel - mesh size $200 \times 50 \mathrm{~mm}-1 \times 6 \mathrm{~mm}$ vertical and $2 \times 8 \mathrm{~mm}$ horizontal wire

2 Post size varies with height (see table)
3 Clamp bar $40 \times 5 \times 6 \mathrm{~mm}$ flat bar (full length mesh

4 Plastic cap- size varies with post (see table)
5 M8 x 40mm stainless steel pin hex dome head security scew

6 Clip-45 mm wide $\times 20 \mathrm{~mm}$ deep
7 Concrete foundation

External Corner Post
