

The **Secura Varimesh** fence system provides a medium level of security. The Varimesh form is derived from the vertical wires being arranged in a 'hit & miss' pattern.

Secura Varimesh is a welded mesh panel with horizontal triangular folds that help to form a strong, rigid fence line, particularly suitable for use as a general purpose boundary fence.

Posts, Clamp Bars & Fixings

The 'post & clip system' is designed with flexibility & modularity in mind. This means the same posts and panels can be used for fencing ends & steps, helping the fence line follow the contours of the ground. Corner posts can be used for both internal and external fence cornering.

The system is easy to install with either bolt-down or dig-in configurations. With the vandal resistant security fixings this 'post and clip system' provides a reasonable level of security to any boundary.

Finish

Panels and posts are submitted to number of precoat processes and are galvanised with the option to be powder coated in a variety of colours. All fixings are fully galvanised, or made from stainless steel.

Typical Construction for Secura Varimesh

Side Elevation

Post Configurations

Intermediate Post

End Post

Internal Corner Post

Construction Key Table

- 1** Mesh Panel - mesh size 200mm x 50/20mm, 5mm horizontal wire, 4mm vertical wire
- 2** Post sizes varies with height (see table)
- 3** plastic cap—60mm x 60mm
- 4** M8 x 30mm stainless steel pin hex dome head security screw
- 5** Triangular fold—2, 3, 4 or 5 per panel (depending on height)
- 6** Concrete foundation
- 7** Durable metal clip

nominal fence height (m)	panel size height x width (m)	No. "V" bars per panel	overall length of post (mm)	post size (mm)	No. of clips on post	ends/inter s	corners
1.2	1230 x 3005	2	1800	60 x 60	3	3	6
1.5	1530 x 3005	3	2100	60 x 60	4	4	8
1.8	1730 x 3005	3	2400	60 x 60	4	4	8
2.0	1930 x 3005	3	2700	60 x 60	4	4	8
2.4	2330 x 3005	4	3150	60 x 60	5	5	10
3.0	2930 x 2455	5	3900	60 x 60	6	6	12
3.0*	2960 x 3005	5	3900	60 x 60	7	7	14
