The Securamesh 2000 fence system provides a Medium level of security fence that is aesthetically pleasing to the eye with high through-visibility, helping it blend into its surrounding. Securamesh is a welded mesh panel with horizontal triangular folds that help to form a strong, rigid fence line, particularly suitable for use around schools, public buildings, retail parks and business premises.

## Posts, Clamp Bars \& Fixings

The posts that Securafit security products offers along with the clomps provides a fixing system allowing for variations whilst securing the panels. The system is easy to install and allows the panels to be stepped, helping the fence line follow the contours of the ground. With the vandal resistant security fixings this post and clamp system provides a much higher level of security than the traditional clip system found in the 1000 mesh system.

## Finish

Panels and posts are submitted to number of precoat processes and are galvanised with the option to be powder coated in a variety of colours. All fixings are fully galvanised, or made from stainless steel.

## Securamesh 2000

Typical Construction for Securamesh
Side Elevation

## Post Configurations

Intermediate Post

End Post

External Corner Post

Internal Corner Post
Please note: The ends of the triangular folds on one of the mesh panes have to be notched (see drawing)

## Construction Key Table

1 Mesh Panel - mesh size $200 \times 55 \mathrm{~mm}-5 \mathrm{~mm}$ wire
2 Post $60 \times 40 \times 2 \mathrm{~mm}$ RHS
3 Clamp bar $41 \times 21 \mathrm{~mm}$ channel (full length mesh panel)

4 Plastic cap-60 x 40 mm
5 M10 X 100mm cup square security bolt, M10 shear nut, M10 washer,

6 Triangular folds-2, 3 or 4 per panel (depending on height)

7 Concrete foundation

| nominal | panel size | weight | No. "V" | verall |  |  |  |  |  | top of post to first | fence |
